

Square Footage Quarters Allowance when available in designated buildings

E1-E4 = 90NSF per person, up to 4 per room, central or shared bath. (BARRACKS)

E5-E6 = 135NSF private room, bath shared with no more than one other. (BARRACKS)

E7-E8 = 270SF private room, private bath (SLQ-BEQ)

E9 = 400SF living room, bedroom, private bath, access to kitchen (SLQ-BEQ)

W01, CW2, 2LT & 1LT = 250SF sleeping/living room, private bath (SLQ-BOQ - Company Grade)

CW3 & O3 = 400SF living room, bedroom, private bath, access to kitchen (SLQ-BOQ - Company Grade)

CW4-CW5 & O4-O6 = 400SF living room, bedroom, private bath, access to kitchen (SLQ-BOQ - Field Grade)

Every effort will be made to provide the minimum square footage based upon rank in the designated build category codes "BEQ-BOQ (Company vs Field Grade). When square footage is not available the focus will be to place the Soldier in the building by category. When a space becomes available the Soldier can request to move into a room that has the minimum square footage but will not be moved into building of another category strictly for additional square footage or other room factors. Only E9, CW3-CW5, O3, O4-O6 have priority to rooms with a kitchen in the room and only when they are available in the designated building code. Example: CW3 will receive quarters with SF and Kitchen only when it's available in Company Grade Quarters unless given an ETP by Housing to reside in Field Grade Quarters. Senior Personnel will not receive an ETP to reside in lower ranking quarters unless so space is otherwise available regardless of size / design. No one will be placed on a waiting list for other quarters without the SSH Branch Chief or Housing Division Chief Approval. Once a Soldier is housed in the correct category of building (*see note below) they are adequately housed and will remain in assigned quarters unless approved for an ETP.

Category Codes:	
Enlisted UPH Barracks	72111
SLQ / UPH, Senior NCO BEQ	72170
SLQ / UPH, Officers Quarters SOQ	72410

NOTE: All SLQ Quarters rated within 85% of the minimum square footage is deemed as suitable based upon Area 1 limited resource abilities to construct / renovate to 1+1, new effort standards. Example: CPT authorized 400SF but if the space that is available is 350 SF or higher they are adequately housed or LT authorized 250SF but if 220SF is available they are adequately housed, SFC authorized 270SF but if 235SF is available they are adequately housed. Those not able to be adequately housed will be quartered for up to 60 days in smaller quarters and given the option to relocate once adequate quarters are available. Those not able to be adequately quartered with 60days will either be quartered in the next higher quarters or processed for a CNA. E1-E6 should always be quartered at minimum SF level.
